**Date:** Tuesday, June 15, 2021 9:46:00 AM

---

Good morning, Talyor.

Per our conversation, I am forwarding a notice to you of a reportable spill that occurred on June 8, 2021 at TEP's GM 21-2-796 well location. A brief description of the incident and coordinates are provided below. COGCC has requested that TEP provide this notification to CPW per Rule 912.b. (10).

Please let me know if you have any questions.

Thank you.

**Subject:** Notice of Reportable Spill at the GM 21-2-796 (COGCC Location ID 311584)

John,

The purpose of this email is to provide you with a notification of a reportable spill that occurred at the GM 21-2-796 location on June 8, 2021. A hole in a produced water tank leaked approximately 35 bbls of produced water into a lined, metal, secondary structure. A vac truck has recovered all of the water from the containment structure. There is no indication that the liner leaked, or any fluids escaped the containment structure, and therefore, there is no threat to public health safety and welfare, or the environment. The defective produced water tank will be replaced tomorrow, June 10, 2021. The cause of the release is equipment failure due to corrosion of the tank. The surface is owned by Solvay Chemicals, Inc. All agency and land-owner notifications are in progress.

An Initial Form 19 with Supplemental information will be drafted and submitted tomorrow, June 10, 2021.

Approximate coordinates:

T. 7 S., R. 96 W., Sec. 2, NENW ¼ ¼  
Lat: 39.470609; Long: -108.077003
