 TRANSECT RESULTS OF DISTURBED AREA% \_\_\_\_\_  
 TRANSECT RESULTS OF REFERENCE AREA% \_\_\_\_\_  
 TOTAL % OF DESIRABLE VEGETATION COVER \_\_\_\_\_  
 VEGETATIVE COVER \_\_\_\_\_

Comment:

	<p>CA's at site have not been resolved. Location condition remains as in previous Inspection.</p> <p>Location does not meet Final Reclamation requirements. Though this may be a drive through location; it does not appear re-contouring of slopes or revegetation activities were completed. Noxious weeds, Houndstongue, White top and rudreral debis weeds are established on site. Road leading SE out of location has developing erosion channel. On the East side of site along the brow at top of Cut slope, erosion and undermining of root systems has occurred.</p>	
Corrective Action:	<p>Perform Final Reclamation per COGCC 1004 Rules including re-contouring, seeding of site and stabilizing slopes of any remaining portions of road. Reseed disturbance areas using a seed mixture requested by the surface owner, or a mixture prescribed by the local county NRCS. Install appropriate BMPs to stabilize location until vegetation establishes, controlling Noxious weeds. All Reclamation Activities to be complete by November 16, 2020.</p> <p>CA Date remains at that of previous Inspection; when Reclamation Activities should have been completed.</p>	Date <b>11/16/2020</b>
<p>Overall Final Reclamation <span style="color: red;">Fail</span>      Well Release on Active Location <input type="checkbox"/>      Multi-Well Location <input type="checkbox"/></p>
