CORRECTIVE ACTIONS:

1 CA# 147985

Corrective Action: Install or repair required BMPs in accordance with good engineering practices per Rule 1002.f.(2)C.

Date: 06/13/2020

Response: CA COMPLETED

Date of Completion: 06/02/2021

Operator Comment:

This Corrective action has several corrective actions within this one CA. This FIRR is being submitted for the slope drain inspection report stating it was not constructed with an appropriate outlet, nor properly secured. This same existing slope drain has been in place for 10 plus years and has had 10 plus inspections. Aside from adding a plug to the top of the drain, no changes have been made. Other inspections have never identified this slope drain as not being constructed using good engineering practices. However, SG added outlet projection upon receipt of this CA. Attached is the BMP design criteria SG uses for this slope drain. Please also note the design meets the definition per CDPHE:

The CDPHE defines good engineering in their COR 40000 Permit p. 21:  
(9) Good Engineering, Hydrologic and Pollution Control Practices: are methods, procedures, and practices that:  
a. Are based on basic scientific fact(s). b. Reflect best industry practices and standards. c. Are appropriate for the conditions and pollutant sources. d. Provide appropriate solutions to meet the associated permit requirements, including practice based effluent limits.
