General Comment:

This is a followup inspection for inspections 680602883 and 693902044. Thousands of untreated diffuse knapweeds observed within the project area. It is evident that spring treatment if conducted, was not thorough or adequate. Infestation is not being controlled and is expanding significantly over time. Corrective action to control weeds is back dated to 8/31/2018 to document duration of non-compliance for potential enforcement purposes.
