#### COMMENTS:

TEP Rocky Mountain LLC (TEP) requests permission to tie the bradenhead into the sales line on the Federal RMV 170-19 well on the RWF 533-19 Pad. A diagram for plumbing the bradenhead into the sales line is attached. Based on surface casing shoe depth of 1,104' this well has a threshold pressure of 331 psi. A Form 17 bradenhead test was completed on 6/2/2021 due to bradenhead pressure exceeding the threshold pressure. This will allow the bradenhead pressure to equalize with our sales line which is currently ~140 psi and protect the integrity of the surface shoe. A check valve will be installed inline to prevent backpressure from the tubing during shut-in periods.

- Surface Casing – 9-5/8" 32.3# set at 1,109' MD (1,104' TVD)
- Production Casing – 4-1/2" 11.6# set at 8,154'
- Spud Date: 6/4/2004
- Completion Date: 8/4/2004
- TOC – 4,000'
- Top of Mesaverde – 4,619'
- Completion – 5,804'- 8,035'
