General Comment:

This is a Final Reclamation Inspection for PA Well API#103-07224, a Fed Mineral /Fee Surface Location, within CPW Jensen State Wildlife Management Area. Well was Spud 7/17/1969 by Cobra O&G; Completed as Dry Hole; Plugged and Abandoned 8/5/1969. Well is not within the surface owned by CPW, but rather in the JWA Management area.

Inspection Submitted to initiate discussion & research on Location as Inspector was unable to access site on insp day. Visual assessment, long view shows the need for an onsite Follow Up. Site appears a large disturbance with extensive steep cut and fill slopes, with sparse revegetation on Pad expanse or slopes. Though Scout Card has Operator as "Unknown" Documents show Cobra O&G as Operator of Record. Notes on Plugging Document says "Reserve Pit fenced---When dried up, backfilled & leveled will notify USGS" Query is in to BLM as to any Fed Documents/Inspections/Status on Location. Aerial and long view Photos attached.
