Comment:

FIR #692401235 observed cellar and conductor remaining at the Location. Inspection required Operator to comply with 1004 rules.

It was observed in this inspection that the cellar and conductor have been removed. This corrective action has been addressed.

Reclamation is considered to be "in process", however Location is predominantly bare or weedy. Additional revegetation activities will likely be required to ensure site progresses towards 1004 standards; a followup inspection will be conducted in a future growing seasons to determine compliance with COGCC 1004 Rules.
