Site Investigation and Remediation Workplan (Supplemental Form)

This form shall be submitted to the Director for approval prior to the initiation of site investigation and remediation activities. However, this shall not preclude the Operator from taking immediate action to protect public health or safety, the environment, wildlife, or livestock.

This Form 27 describes site conditions as currently understood by the Operator; approval of this Form 27 by COGCC is based on the site conditions accurately described herein; any changes in site conditions identified during or subsequent to the performance of the approved workplan may necessitate additional investigation or remediation which shall be described on a supplemental Form 27. This Form 27 is intended to provide basic information regarding the proposed site investigation and remediation actions, but the workplan may be more fully described in attached documentation.

INITIAL ACTION SUMMARY

Description of initial action or emergency response measures take to abate, investigate, and/or remediate impacts associated with E&P Waste.

KPK is requesting to remove the production pit from the WAGNER #1 DNR Tank Battery. The tank battery is planned to be removed. The pit will be permanently closed per Rule 905.b.

PROPOSED SAMPLING PLAN**Proposed Soil Sampling**☒ Will soil samples be collected as part of this investigation? (Number, type (grab/composite), analyses, and locations of samples):

Five (5) discrete soil samples will be collected from the base of the produced water vessel (~4 ft below ground surface) to verify soil was not impacted from the operation of the pit. Analysis for grab samples included TPH (DRO & GRO), BTEX, pH, EC, and SAR. See attached site map for partially buried vessel location and proposed sampling locations.

Proposed Groundwater Sampling☒ Will groundwater samples be collected as part of this investigation? (Number, analyses, and locations of samples):

If groundwater is encountered during pit removal activities, a minimum of one grab sample will be collected as soon as practical following removal of the pitl and submitted for laboratory analysis of BTEX.

Proposed Surface Water Sampling☐ Will surface water samples be collected as part of this investigation? SOURCE REMOVAL SUMMARY

Describe how source is to be removed.

If soil is found to be impacted due to the operation of the partially buried produced water vessel, soil will be excavated until soil sample results show no exceedances of Table 910-1 thresholds.

Soil sample results indicate soil was not impacted.

REMEDIATION SUMMARY

Describe how remediation of existing impacts to soil and groundwater is to be accomplished (i.e. summarize remedial action plan). Provide a brief narrative description including: technical justification, schedule for implementation, estimated time to attain NFA status, plus plans and specifications for the selected remedial action technology.

Impacted soil will be excavated and disposed of at a certified disposal facility.

Impacted soil was not detected from pit. Excavation activities were not performed at pit location.
