Subject: Volk Pad

Eric,

The Volk pad was sprayed on 7/6/21. The road leading to it was sprayed for any noxious weed that was seen. The main weed on the pad inside the fence was Kochia. Outside of the fence had Canada thistle, Mullien, and Musk Thistle. With the recent rains, all the weeds were at a great stage to have very effective control. The area was sprayed with different combinations of Milestone, Escort, and Rifle.

If you need any more information let me know.

Thank you,
