COGCC Inspection Report Summary

On Thursday 7/15/21 at approximately 11:00 hours, I, Inspector Corey De Paolo, Conducted an on-site inspection at TEP ROCKY MOUNTAIN LLC BOSELY /GM 34-14, Location #334753 in Garfield County Colorado.
Refer to document #701101161 inspection conducted on 2/12/21 for previous corrective actions.

While there, I observed damage caused by a large precipitation event that occurred on Wednesday July 14th. Sediment has been transported on to location and is encroaching on production equipment. Sediment traps and BMP's up stream of location have been filled and over run. Wattles and other forms of velocity checks have been removed and washed downstream by storm water. The ditch on the West edge of location shows signs of subsidence. Downstream of location, the transportation of sediment and debris continued on to HWY 6. Additionally the transportation of sediment continued down the pipeline right of way that parallels HWY 6 for approximately 180 yards.

During this inspection the following compliance issues were observed:

- 1) Due to a large precipitation event multiple places with sediment accumulation and debris throughout location and access road with a corrective action date of 7/22/21.
- 2) No form of tracking BMP has been implemented to prevent further tracking. BMP's have not been repaired or implemented to prevent further sediment migration with a previous corrective action date of 2/27/21.

- The Location is located in a high priority habitat area. All drainages contribute to the Colorado River.

A follow up on this site inspection needs to be conducted to ensure the Compliance issues have been corrected to comply with COGCC rules.
This is a summary of inspection report.
