**General Comment:**

Bradenhead Inspection

CA's from inspection #700600273-propane regulator at the well was fixed and not leaking; stained soil at truck loadout and wellhead were cleaned up and removed from location (see attached photos); and it was noted that the trucks need room to make a U turn into the truck loadout connection so the area will be used when the well is back to producing and interim reclamation will not be needed yet.
