Comments:

The former BLUE SKY 6-12 well (API: 05-081-06961) was permitted but never drilled. On June 3, 2021, WSP conducted a final reclamation inspection for the former BLUE SKY 6-12 planned location (Location ID: 392393). The location is situated on non-irrigated rangeland and has been returned to that land use. A modified step-point vegetation survey was conducted on the reclaimed well pad and on adjacent reference areas for comparison. Foliar and basal cover, along with non-vegetated, and noxious weed occurrences were documented. No noxious weeds were observed onsite and undesirable species, if present, were excluded from the vegetative coverage calculation. Survey results indicate the reclaimed area has a foliar vegetative cover that is 80% of the undisturbed reference area.

Photographs of the P&A location were taken facing each cardinal direction from the P&A wellhead location.
