Spills/Releases:

Type of Spill: _____ Estimated Spill Volume: _____

Comment: See Spill/Release ID 480228 for more information. 7/1/2021 COGCC staff observed an excavation measuring approximately 40'x10'x6' (LxWxD), this excavation contained a 4" gathering line which was buried approximately 4 feet below ground surface. The excavation also contained a culvert which runs underneath the road and empties into a drainage. The drainage then flows into a surface water feature located west of the excavation. The surface water feature west of the excavation and road contained flowing water at time of inspection. Two stockpiles of potentially impacted material were observed on the east side of the excavation. The two stockpiles of potentially impacted material had a detectable hydrocarbon odor at time of inspection. See attached photo log for detail.
