Site Investigation and Remediation Workplan (Supplemental Form)

This form shall be submitted to the Director for approval prior to the initiation of site investigation and remediation activities. However, this shall not preclude the Operator from taking immediate action to protect public health or safety, the environment, wildlife, or livestock.

This Form 27 describes site conditions as currently understood by the Operator; approval of this Form 27 by COGCC is based on the site conditions accurately described herein; any changes in site conditions identified during or subsequent to the performance of the approved workplan may necessitate additional investigation or remediation which shall be described on a supplemental Form 27. This Form 27 is intended to provide basic information regarding the proposed site investigation and remediation actions, but the workplan may be more fully described in attached documentation.

Closure request is not available for an Initial Site Investigation and Remediation Workplan.

INITIAL ACTION SUMMARY

Description of initial action or emergency response measures take to abate, investigate, and/or remediate impacts associated with E&P Waste.

KPK is requesting to remove the 100 bbl produced water storage vessel, which meets the definition of a partially buried vessel, from the JOHNSON #32-30 Tank Battery. The well associated to the tank battery is being P&A'd and the facility is planned to be removed. The partially buried storage vessel will be permanently closed per Rule 905.b.

PROPOSED SAMPLING PLAN**Proposed Soil Sampling**☒ Will soil samples be collected as part of this investigation? (Number, type (grab/composite), analyses, and locations of samples):

Five (5) discrete soil samples will be collected from the base of the produced water vessel (~3 ft below ground surface) to verify soil was not impacted from the operation of the partially buried produced water vessel. Analysis for grab samples included Table 915-1 analytes. See attached site map for partially buried vessel location and proposed sampling locations.

SOURCE REMOVAL SUMMARY

Describe how source is to be removed.

If soil is found to be impacted due to the operation of the partially buried produced water vessel, Form 19 will be submitted reporting the associated release. Impacted soil will be excavated until soil sample analyses results show no exceedances of Table 915-1 thresholds.

REMEDIAL SUMMARY

Describe how remediation of existing impacts to soil and groundwater is to be accomplished (i.e. summarize remedial action plan). Provide a brief narrative description including: technical justification, schedule for implementation, estimated time to attain NFA status, plus plans and specifications for the selected remedial action technology.

Impacted soil will be excavated and disposed of at a certified disposal facility.

OPERATOR COMMENT

KPK is requesting closure of remediation project #16995.

No visual, olfactory, or screening evidence of contamination was observed after removing the PBV. Discrete soil samples show no evidence of contamination. No ground water was encountered. Initial background sample taken on 3/1/21 is suspected to be topsoil based on sample results. Additional background samples were taken on 6/8/21 for background arsenic levels since excavation samples were above the Table 915-1 arsenic standard.

Sample map, sample results and photos are attached.

I hereby certify all statements made in this form are to the best of my knowledge true, correct, and complete.
