Site Investigation and Remediation Workplan (Initial Form)

This form shall be submitted to the Director for approval prior to the initiation of site investigation and remediation activities. However, this shall not preclude the Operator from taking immediate action to protect public health or safety, the environment, wildlife, or livestock.

This Form 27 describes site conditions as currently understood by the Operator; approval of this Form 27 by COGCC is based on the site conditions accurately described herein; any changes in site conditions identified during or subsequent to the performance of the approved workplan may necessitate additional investigation or remediation which shall be described on a supplemental Form 27. This Form 27 is intended to provide basic information regarding the proposed site investigation and remediation actions, but the workplan may be more fully described in attached documentation.

Closure request is not available for an Initial Site Investigation and Remediation Workplan.

SOURCE REMOVAL SUMMARY

Describe how source is to be removed.

The Hoaglund GV 79-35 will be plugged and abandoned per the approved Form 6 (doc # 402608187) which is attached to this Form 27.

REMEDIAL ACTION SUMMARY

Describe how remediation of existing impacts to soil and groundwater is to be accomplished (i.e. summarize remedial action plan). Provide a brief narrative description including: technical justification, schedule for implementation, estimated time to attain NFA status, plus plans and specifications for the selected remedial action technology.

This request is for the routine plugging and abandonment of a single well at the GV 79-35 well pad (COGCC Location ID 334762). There are no known or anticipated impacts from contaminated materials related to the plugging and abandonment of this well. Any contaminated soils encountered during these routine P&A activities will be immediately assessed for compliance with COGCC 915-1 cleanup standards and cleaned-up accordingly.
