FIELD INSPECTION FORM

Loc ID 465461 Inspector Name: Sherman, Susan On-Site Inspection 2A Doc Num: _____

Status Summary:

- THIS IS A FOLLOW UP INSPECTION
- FOLLOW UP INSPECTION REQUIRED
- NO FOLLOW UP INSPECTION REQUIRED

Operator Information:

OGCC Operator Number: 10633
Name of Operator: CRESTONE PEAK RESOURCES OPERATING LLC
Address: 1801 CALIFORNIA STREET #2500
City: DENVER State: CO Zip: 80202

Findings:

- 8 Number of Comments
- 1 Number of Corrective Actions
- Corrective Action Response Requested

ANY CORRECTIVE ACTION(S) FROM PREVIOUS INSPECTIONS THAT HAVE NOT BEEN ADDRESSED ARE STILL APPLICABLE

General Comment:

MIRU/After Frac/Flowback Inspection

Per operator 2 wells were flowing back, one well was being drilled out and one well was waiting to be drilled out. Ideal had two flowback set ups, one for the rig and one for the wells. This company was asked for the combustors gas burning efficiency but this was not known and when the combustor was checked for a pilot light and/or switch lights. The pilot light was not on and many connection pieces were laying in a pile at the base of the combustor. Verify combustor efficiency and operation with COGCC Engineer.

Production side of pad was under construction. Stained soil pile fenced and location south of production side of pad.

Work was in process to maintain ditches/slopes for water erosion from the fire (see attached photos). Straw is used as mulch and needs better crimping to prevent it from blowing as observed on location.
