General Comment:

On 8/4/2021 Catherine Roy conducted a reclamation and stormwater inspection. During this inspection the following compliance issues were observed:

-Corrective actions from 2015 reclamation inspection are not addressed and non-compliance remains. Corrective action dates are back-dated to document the duration of non-compliance for potential enforcement.

-Control weeds. Corrective action is back-dated to 5/31/2016.

-Recontour and reclaim location including stockpiled soil vehicle turnaround, areas with sparse vegetation, and access road areas (as determined by USFS). Corrective action timing backdated to original date 5/31/2016.

-Revegetation needs to utilize a native seed mix representative of the native reference area vegetation unless otherwise specified by USFS.

See below, and attached photos for additional detail.

Comment: Approximately 150 flowering musk thistles observed within the project area. Weeds are not being controlled.
Soil mound described during 2016 reclamation inspection remains within the project area and needs to be recontoured.
Parking area and portions of the former reclamation area appear compacted with little to no desirable vegetation present. Access road remains in place and needs reclamation.

Corrective Action:	-Control weeds. Corrective action is back-dated to 5/31/2016. -Recontour and reclaim location including stockpiled soil vehicle turnaround, areas with sparse vegetation, and access road areas (as determined by USFS). Corrective action timing backdated to original date 5/31/2016.	Date 05/31/2016
