General Comment:**COGCC Inspection Report Summary**

On Tuesday 8/3/2021 at approximately 1000, I, Inspector Scott Ramsey, conducted a follow up inspection at TEP A-29D, at Location # 335629 in Rio Blanco county Colorado.

While there, I observed normal production operations. All meters have been calibrated on location within the past year. This location is within or in close proximity to a CPW Density/High Priority Habitat, black bear, NSO habitat and Wildlife Management Area. Operator (TERRA) has provided there Piceance Basin Storm water Manual of BMP's (SC-4) for a tracking pad, there is no evidence of a tracking pad at time of inspection.

C/A (battery signage) from previous inspection document # 701500561 has been completed.

During this inspection the following compliance issues were observed:

1. Location shows signs of erosion by tank battery and along berms around location.
2. Cut slope shows signs of erosion and lack of stabilization.
3. Storage of equipment on edge of location(piping and wood)

Refer to photograph of observed compliance issue.

A follow up on this site inspection will be conducted to ensure the compliance issues have been corrected to comply with COGCC rules.

This is a summary of inspection report.
