Longmont Farms #5 Flowline Release

Remediation Project#: 18932  
Weld County, Colorado

Site Investigation and Remediation Report

Submitted: August 13, 2021

---

## **1.0 INTRODUCTION**

---

K.P. Kauffman Company, Inc. (KPK) has performed an investigation and remediation following the discovery of the Longmont Farms #5 flowline release (Remediation Project# 18932) in Weld County, Colorado. The flowline release was discovered on 1/19/2021, northeast of the intersection of Weld County Road (WCR) 16 and WCR 7. The location of the flowline release is illustrated on Figure 1 which has been provided in Appendix A. KPK has performed excavation activities to further investigate and remediate the flowline release location, as well as completed necessary repairs to bring the flowline back into service. Based on completed site investigation and remediation activities performed, the soil impacts from flowline release location have been 1) delineated both vertically and horizontally and 2) removed and disposed of at a certified disposal location. A piezometer was installed at the request of the COGCC to determine if there was a pathway to ground water. Based on the depth of the excavation at 13 ft, and the absence of water down to a depth of 17 ½ ft, no pathway to ground water exists. The ground water well report is attached to COGCC Form 27 Doc#402777901.

---

## **2.0 FIELD ACTIVITIES**

---

### **2.1 Flowline Release Investigation**

On, or about June 21, 2021 excavation of impacted soil as a result of the flowline release was completed by KPK. The excavation of contaminated soil created an area of approximately 70 feet (ft.) long, 75 ft. wide, and 13 ft. deep. The excavation area is illustrated in Figure 2 which has been provided in Appendix A. Photographs of the excavation have been provided in Appendix B. Top soil was present along the sidewalls of the excavation area from the surface to 1 ft. below ground surface (BGS). The top soil was underlain by sandy clay to the base of the excavation area. Groundwater was not encountered during the excavation process. A piezometer was installed at adjacent to the excavation down to a depth of 17 ½ feet BGS. The Piezometer was checked several times and no groundwater was observed (see GW report attached to COGCC Form 27 402777901). Due to the observed presence of a minimum of 4 feet of clean material, KPK asserts no pathway to ground water exists.

Prior to the collection of discrete soil samples, the sidewalls and floor of the excavation area were field screened using a photoionization detector (PID) equipped with a 10.8 electro-volt lamp. PID field screening did not detect any presence of volatile organic compounds (VOCs) in the soil,

indicating that the contaminated soil had been fully excavated and that the soil impacts associated with the flowline release had been defined both vertically and horizontally. Removal of impacted soil was confirmed with soil sampling and analysis described below.

Based on excavation size and disposal tickets, KPK removed and estimated 2,400 tons (2,000 cubic yards) of impacted soil from the flowline release location and hauled it to a certified disposal facility. Soil manifests for the contaminated soil have been included in Appendix C.

## **2.2 Soil Sampling**

On June 21, 2021, KPK collected ten (10) soil samples from the excavation area at a depth of 7 ft. BGS on the sidewalls and 13 ft on the excavation center. The soil sample locations were chosen based on the results of PID field screening. Based on PID field screening producing no detection of VOCs from the excavation area, two soil samples were collected from sides of the side walls and floor, as a best representation of the entire excavation area. The soil sample locations are illustrated in Figure 2 which is included in Appendix A.

The collected soil samples were field screened for VOCs with a PID. The PID did not detect a presence of VOCs in any of the soil samples. The collected soil samples were screened for odors, staining and/or discoloration. None of the samples exhibited any hydrocarbon odor, staining or discoloration.

## **2.3 Analytical Results**

The soil samples were handled with clean, new, nitrile gloves and placed in laboratory supplied sample containers and labeled. Collected soil samples were placed in a cooler with ice and delivered to a certified laboratory under chain-of-custody documentation. Per COGCC Rule, all collected soil samples were analyzed for the full suite of Table 915-1 analytes, including inorganics and metals.

The laboratory results indicated soil samples collected from the excavation area were either non detect or below the COGCC reporting limit based on thresholds established in Table 915-1, with the exception of arsenic. Three background sample was collected to show that arsenic is naturally occurring in high concentrations in the area of the flowline release location. The results of the background sample show native soils have arsenic concentrations comparable to the confirmation soil samples collected from the excavation area (i.e., samples collected from the

excavation area had measured arsenic levels within 1.25x the collected background sample). The laboratory results have been summarized in Appendix D.

The laboratory analytical reports and chain-of-custody (COC) forms are included in Appendix E.

---

---

### **3.0 CONCLUSIONS AND RECOMMENDATIONS**

---

---

On or about June 21, 2021, the excavation of contaminated soil at the Longmont Farms #5 flowline release was completed to a depth of 13 ft. No groundwater was encountered during the excavation process. Ten (10) discrete soil samples were collected and analyzed for analytes in Table 915-1 following the completion of excavation activities. The laboratory results indicated that only arsenic exceeded thresholds established in Table 915-1; however, the analytical results of the collected background sample show that arsenic is naturally occurring above the threshold in Table 915-1.

Based on the analytical results of the soil samples and water, additional work at the flowline release location is not warranted at this time.

## Sample Receipt Checklist

S2 Work Order \_\_\_\_\_

Client: KP Karffman Client Project ID: Longmont Farms Unit #5Shipped Via: ☐ H.D./P.U./FedEx/UPS/USPS/Other \_\_\_\_\_ Airbill #: \_\_\_\_\_Matrix (check all that apply): ☐ Air ☒ Soil/Solid ☐ Water ☐ Other: \_\_\_\_\_  
(Describe)

Temp (°C)	<u>18</u>
-----------	-----------

Thermometer ID: 61857155-K

	Yes	No	N/A	Comments (if any)
If samples require cooling, was the temperature at 4°C +/- 2°C <sup>(1)</sup> ? NOTE: If samples are delivered the same day of sampling, this requirement is met provided that there is evidence that cooling has begun.	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<u>On ice.</u>
Were all samples received intact <sup>(1)</sup> ?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
Was adequate sample volume provided <sup>(1)</sup> ?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
If custody seals are present, are they intact <sup>(1)</sup> ?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	
Are samples with holding times due within 48 hours sample due within 48 hours present?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	
Is a chain-of-custody (COC) form present and filled out completely <sup>(1)</sup> ?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
Does the COC agree with the number and type of sample bottles received <sup>(1)</sup> ?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
Do the sample IDs on the bottle labels match the COC <sup>(1)</sup> ?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
Is the COC properly relinquished by the client w/ date and time recorded <sup>(1)</sup> ?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
For volatiles in water – is there headspace present? If yes, contact client and note in narrative.	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	
Are samples preserved that require preservation (excluding cooling) <sup>(1)</sup> ? Note the type of preservative in the Comments column – HCl, H2SO4, NaOH, HNO3, ect	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	
If samples are acid preserved for metals, is the pH ≤ 2 <sup>(1)</sup> ? Record the pH in Comments.	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	
If dissolved metals are requested, were samples field filtered?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	

Additional Comments (if any):

<sup>(1)</sup> If NO, then contact the client before proceeding with analysis and note in case narrative.JB

### Notes and Definitions

DET	Analyte DETECTED
ND	Analyte NOT DETECTED at or above the reporting limit
NR	Not Reported
dry	Sample results reported on a dry weight basis
RPD	Relative Percent Difference
