General Comment:

On 8/13/2021, Reclamation Specialist Trujillo conducted an interim reclamation and stormwater inspection at Laramie Energy's NVega 2A Pad location in Mesa County, Colorado.

The following compliance issues were observed during this inspection:
1003: Interim Reclamation

Refer to the "Reclamation" section of this inspection report for additional details.

Refer to the photo-documentation of the observed compliance issues attached to this report.

Any corrective action(s) from previous inspections that have not been addressed are still applicable.

A follow up inspection on this site will be conducted to ensure the compliance issues have been corrected to comply with COGCC rules.

Comment

Records show "2014" as the date of 1st production, for last well to go into production; at least 6 growing seasons have passed since COGCC 1003 interim reclamation was required.

It was observed in this inspection that the slopes on the southern/southwestern interim areas are not progressing towards 1003 reclamation standards; soils predominantly bare; desirable vegetative germination and establishment is not uniform.

Additional revegetation activities required for site to progress towards 1003 standards.

Corrective Action

Comply with COGCC 1003 rules; conduct additional revegetation activities on areas of the Location not progressing towards a uniform vegetative establishment. Comply with 1002.f rules and implement control measures to stabilize the slopes and seeded soils. To allow for a fall seeding, a CA date of 11/15/2021 is being provided to complete reclamation work.
