## DESCRIPTION OF IMPACT

Impacted?	Impacted Media	Extent of Impact	How Determined
UNDETERMINED	GROUNDWATER	To be determined	Visual inspection
UNDETERMINED	SOILS	To be determined	Soil analysis
UNDETERMINED	SURFACE WATER	To be determined	Visual inspection

## INITIAL ACTION SUMMARY

Description of initial action or emergency response measures take to abate, investigate, and/or remediate impacts associated with E&P Waste.

Visual inspection will be performed looking for signs of stained soil and any potential leeching of pit components that may have impacted surface or ground water. Location, size and estimated closure date will be determined, as best as possible, using sundries, historic Google Earth imagery, site security diagrams and knowledge of the area obtained from Wexpro personnel. It is believed that most, if not all, Hiawatha and Sugarloaf pits were lined with bentonite liners. These liners would have been broken up during the process of "stirring and airing" that occurs on all Wexpro pits prior to sampling.

## PROPOSED SAMPLING PLAN

### Proposed Soil Sampling

☒ Will soil samples be collected as part of this investigation? ( Number, type (grab/composite), analyses, and locations of samples ):

72 hour notification will be given to COGCC. Pit samples will be obtained using an auger attached to a skid steer. Enough discrete samples to adequately characterize the impact of the pit will be collected from the pit bottom and/or sidewalls. If the location of the load line's entrance to the pit is known, a sample will of the wall opposite the load line's entrance will be collected. The sample estimated to be the most impacted will be tested per Table 910-1, with the other samples to be tested for TPH, BTEX, PAH and Inorganics. Depth of samples will be determined by visual observations during sampling, as to best obtain a sample of native soil. All samples will be analyzed at a third party lab and submitted to COGCC in a Form 27, either requesting closure or with a remediation plan. Background samples will also be collected.

### Proposed Groundwater Sampling

☐ Will groundwater samples be collected as part of this investigation? ( Number, analyses, and locations of samples ):

Crews will be watching for indications of ground water during sampling. If ground water is encountered, COGCC will be notified immediately.

### Proposed Surface Water Sampling

☐ Will surface water samples be collected as part of this investigation? ( Number, analyses, and locations of samples ):
