Date: 07/17/2021

Response: CA COMPLETED Date of Completion: 07/15/2021

The well is no longer venting through the thief hatch and vent pipe off the production tank since being shut in on

Operator Comment: 7/15/2021. This was done after Phoenix Resources received an email from the CDPHE that a FLIR camera video had been taken of our location which showed venting from the production tank. Since shutting in the well, we have ordered an Enardo stack valve and new thief hatch to address the venting. Additionally, we have submitted a Form 4 - Request to Vent, since emissions from our thief hatch and vent pipe are due to breathing losses. There is no saleable gas produced from the Mary Hite Fee well, and this location is APEN exempt as it is and <2 tpy using State default emissions factor for crude oil in Routt County.

COGCC Decision: Approved

OPERATOR COMMENT AND SUBMITTAL

Comment: Upon approval of our Form 4 - Request to Vent and installation of Enardo stack valve and new thief hatch, Phoenix Resources plans to put the well back on production.

I hereby certify that the statements made in this form are, to the best of my knowledge, true, correct, and complete.
