Describe what is known about the spill/release event (what happened -- including how it was stopped, contained, and recovered):

A compromised separator released approximately 2.5 bbls of oil to the ground outside of containment. The separator is scheduled to be replaced and the impacted soil will be removed. Confirmation soil samples will be collected and submitted for laboratory analysis. Soil samples will be analyzed in compliance with COGCC Table 915-1 for TPH (total volatile [C6-C10] and extractable [C10-C36] hydrocarbons) and organic compounds in soil. Analytical results will be included in a supplemental report.
