

6 Month Abatement Summary

	Well: Lofland 22T-402
	API: 05123378110000

Bradenhead Test Data	Date	Event Measurement
Form 17 Bradenhead Test Report (psig)	7/26/2020	63
Abatement System Commission Date	8/26/2020	-
Form 17 Bradenhead Test Report, Follow Up (psig)	2/21/2021	63
Abatement System Volume Measurement (CF/Day)	9/25/2020	2.66

Comments: 2020 annual test had 63 PSI gas flow that blew down to 0 psi in thirty minutes. Abatement system follow-up test had 63 PSI that blew down to 0 PSI within thirty minutes. A sample was able to be obtained and analyzed. Bradenhead gas determined to be thermogenic gas with a similar composition as the production gas sample. PDC plans to P&A this well per COGCC requirements.

(This well is not equipped with a bradenhead pressure transducer.)
