

# WATER PLAN

---

Twin Bridges Resources LLC has prepared this Water Plan for the Red Rocks 1-13 exploratory helium gas well in Las Animas County, Colorado. The sections below correspond to Colorado Oil & Gas Conservation Commission requirements in Rule 304.c.(18) to prepare a Water Plan and the water sourcing criteria in the rules.

## 1. PLANNED SOURCE, VOLUME, AND COORDINATES

Water to support well development will be sourced from groundwater. The estimated volume will be 200 bbl of water for the single helium gas well on the oil and gas location. The coordinates of the planned source of water are:

37.474157  
-103.536369

Lat 37° 28' 26.9646" / Lon -103° 32' 10.9278"

## 2. SELLER'S NAME AND ADDRESS

Water will be sourced from the landowners listed below.

Tom and Kimberly Dahlberg  
11805 Prestwick Rd.  
Belvidere, Illinois 61008

## 3. RECYCLED OR REUSED WATER

Recycled or reused water will not be available for this location.

## 4. FRESH WATER

Freshwater is anticipated to be used because sources for recycled and reused water are not available for this development.
