General Comment:

On 9/16/2021 Catherine Roy conducted a followup reclamation and stormwater inspection. During this inspection the following compliance issues were observed:

- Stormwater controls installed in the northern project area are not adequate and erosion continues. Stormwater controls need to be selected, sized, installed, and maintained according to good engineering practices. Corrective action to stabilize erosion is back-dated to 1/16/2020 to document duration of non-compliance. It is the expectation that corrective action be immediately addressed.
- Scattered Russian knapweeds need to be controlled by 10/17/2021. Corrective action from 2018 inspection is only partially addressed.

See below, and attached photos for additional detail.
