Corrective Action: -Remove and properly handle debris that is discharged from the access road, by 9/27/2021.

Date: 09/27/2021

Response: CA COMPLETED

Date of Completion: 09/24/2021

Operator
Comment: Work Detail: Charley Dean with 3D went to location ON 9/24/2021 and dug up a good deal of gravel as required, part of which was washed off road and filled the potholes and washouts on other side of cattle guard with that material. He spread good topsoil on washed out areas, seeded as needed, cleaned up drainage trenches from Red Cedar plant, straightened the oxbow at outlet of culvert to speed up drainage and reduce erosion, cut willows and cleaned up inlet flow into the 24" culvert.

COGCC Decision: _____

COGCC
Representative:

4 CA# 155243

Corrective Action: Install stormwater controls to stabilize erosion and sediment transport along the access road. 2018 Corrective action is not adequately addressed. Corrective action date is back-dated to document duration of non-compliance.

Date: 10/08/2018

Response: CA COMPLETED

Date of Completion: 10/08/2018

Operator
Comment: Storm water controls were implemented as outlined in the inspection from 2018. Upon the most recent inspection (8/14/2021) it was discovered that a huge rainstorm had occurred and the culvert had debris and trees that had blocked the flow of water causing it to back up. We have added a monthly inspection of the culvert to check for blockages and avoid future issues.
