General Comment:

COGCC Inspection Report Summary

On Thursday 9/30/2021 at approximately 1200, I, Inspector Scott Ramsey, conducted a routine inspection at TEP RWF 242-32, at Location # 335066 in Garfield county Colorado.

While there, I observed normal production operations. All meters have been calibrated on location within the past year. This location is within or in close proximity to a CPW Density/High Priority Habitat, black bear, NSO habitat, Wildlife Management Area. Operator (TERRA) has provided there Piceance Basin Storm water Manual of BMP's (SC-4) for a tracking pad, there is no evidence of a tracking pad at time of inspection.

During this inspection the following compliance issues were observed:

1. Location shows signs of lack of stabilization/compaction
2. Missing bull plugs/caps on load out lines
3. Four quad unit horizontal separators includes 8 glycol storage tanks, approximately 174" x 33" x 42" = 25 BBLS each, storage vessels contain no labeling to specify capacity or chemical hazard information.

Refer to photograph of observed compliance issue.

A follow up on this site inspection will be conducted to ensure the compliance issues have been corrected to comply with COGCC rules.

This is a summary of inspection report.
