Max,

Chris is out today. Due to the proximity of the impacts to the domestic water well, COGCC approves your plan as outlined in the email. Please include the recovery well construction logs and installed locations on a site figure with your most recent assessment data on a supplemental Form 27 within 10-days after installation.

Thank you,
John

Hi Chris,

Wanted to provide an update on the E. Stieber Consolidation (REM #19616). Yesterday, KPK's consultant observed free product from 2 of the monitoring wells, MW-3 and MW-4. KPK's has been conducting daily hydrovac of the existing standpipe. During each daily hydrovac, there is no free product present. Based on this information, it appears the oil is migrating, and the current standpipe is no longer in the proper location. To address the noted migration, KPK would like to install 2 additional standpipes in locations shown on the attached map. The standpipes would also be hydrovac'd daily like the initial one. Moving forward, I do want to have your approval for this plan. More details can be provided in a supplemental Form 27; however, KPK would like to respond immediately to address the recent observations.

Thanks,

Max
