COGCC Rules (check all that apply)

1101. Installation and Reclamation 1102. Operations, Maintenance, and Repair 1103. Abandonment

Comment: Flowline as mapped by operator crosses public right of way or utility easement but is not marked per rule 1102.g.2. The attached aerial image shows the location of flowline 476185 as provided by Operator on form 44 submittal. The flowline runs from the Cary Walkling 1 (123-09717) well (north of WCR 18.5) to a battery (south of WCR 18.5) facility 480225 and must cross the public right of way at some point.

Inspection along both sides of WCR 18.5 did not find any signs indicating the location of flowline facility 476185 which is indicated to cross the county road right of way as shown on the attached Sept2020 aerial image. Attached aerial indicates mapped location of flowline and area which was searched for required sign(s) indicating crossing of right of way. The only signs observed along the section of road which was inspected were from a mid-stream gas gathering system with signs indicating operator of that line as Kerr McGee Gathering/Anadarko.

Corrective Action: **Install markers that identify the location of flowline where it crosses the public right of way (WCR 18.5) following language per Rule 1102.g.(2)**

Date: 11/07/2021
