Inspected Facilities:

Facility ID	Type	Status	Status Date	Well Class	API Num	Facility Name	Insp Status
428334	LOCATION	AC	03/26/2012		-	Lincoln Disposal Tank Battery	EI

General Comment:

This is an environmental inspection only. Any corrective actions from previous inspections are still in effect.

Inspection found recent leak of crude oil from tanks inside containment. Spill appears to have been confined to inside containment. Operator shall report spill vial Form 19 spill report process and document clean up. See spill corrective action.

Immediate action is required of Operator. This tank battery is in disrepair. Tanks are rusted and failing resulting in spill of crude oil. Evidence of tanks overflowing. Operator is advised that maintaining a facility in this condition is a violation of COGCC rules. Tanks that are rusted, lack integrity and cannot hold fluid should be immediately removed from service.

This location will be placed on a list to be regularly inspected by Area Environmental Protection Specialist to document compliance with COGCC rules. Follow up inspection will occur in early November.
