Photo 1. View of project area facing center from the northern well pad.

Photo 2. View of the southern project area facing westward. Dense kochia is present. Established vegetation appears to be dying. It is not apparent how/why. Potentially herbicide overspray.

Photo 3. View of dying western wheatgrass plants in the southern project area.

Photo 4. View of reference area comprised of sagebrush shrubland and pinyon-juniper woodland with James galleta, western wheatgrass, matte penstemon, and sticky rabbitbrush.
