Describe what is known about the spill/release event (what happened -- including how it was stopped, contained, and recovered):

LOGOS Operating believes less than 1 barrel of compressor oil and produced water was released into containment and less than 5 gallons ended up outside of that containment. LOGOS was unable to locate any signs of this flood created release greater than a few feet from the containment ring. It appears that the containment did its job. LOGOS Operating will remove and properly manage gravel, rock, and material displaced and discharged downslope of the well pad as soon as a one call can be cleared and crews become available. LOGOS began working on this issue as soon as it came to our attention and will continue to resolve the issues until they are complete.

OPERATOR COMMENTS:

Mr. Hughes was contacted on 7/29/2021 to report this non-reportable release, of 1 barrel water and compressor oil inside containment and ~ 5 gallons out of containment. All free liquids and contaminated soil associated with this release cleaned up, removed and properly disposed of by a hydrovac truck on 7/30/2021. per Rule 912.a. and Per Rule 912.e.(1) Logos Operating will submit a supplemental Form 19 to close the Spill/Release Point ID #480361. The BGT containment has been re-set and armored in an effort to keep this from happening in the future.

I hereby certify all statements made in this form are to the best of my knowledge true, correct, and complete.
