General Comment:

COGCC Inspection Report Summary

On Tuesday 10/5/2021 at approximately 1000, I, Inspector Scott Ramsey, conducted a routine inspection at TEP RGU 23-6, at Location # 335602 in Rio Blanco county Colorado.

While there, I observed normal production operations. All meters have been calibrated on location within the past year. This location is within or in close proximity to a CPW Density/High Priority Habitat, black bear, NSO habitat, Wildlife Management Area. Operator (TERRA) has provided there Piceance Basin Storm water Manual of BMP's (SC-4) for a tracking pad, there is no evidence of a tracking pad at time of inspection.

During this inspection the following compliance issues were observed:

1. Unused equipment (hoses).
2. Random debris around location.
3. One of the chemical tank labels is not legible.
4. One tank heater is open for wildlife to enter.
5. Three quad unit horizontal separators includes 6 glycol storage tanks, approximately 174" x 33" x 42" = 25 BBLS each, storage vessels contain no labeling to specify capacity or chemical hazard information.

Refer to photograph of observed compliance issue.

A follow up on this site inspection will be conducted to ensure the compliance issues have been corrected to comply with COGCC rules.

This is a summary of inspection report.
