# GAS CAPTURE PLAN

**BNL** | ENTERPRISE

**Enterprise State 16-1 (2962)**

Sec. 16 T29S R62W (NE/4 SE/4)

Las Animas County, Colorado

Surface: State

Submitted as an accompaniment to the Form 2A Application  
and consistent with the requirements of Rule 903.e.

Original Submittal: April 14, 2021

Revised: June 30, 2021

Revised: October 13, 2021

## **BNL (Enterprise) Inc. Las Animas County, Colorado**

### **Gas Capture Plan**

Enterprise (BNL) Inc.'s (Enterprise) Gas Capture Plan will encompass the Enterprise State 16-1 (2962) well drilled in Section 16 Township 29 South Range 62 West, that penetrates state minerals. This plan covers helium capture, storage and processing. The plan minimizes waste and maximizes value for mineral owners, Enterprise, and the State of Colorado.

Helium storage: This location is committed to a capture and storage system on the pad. No natural gas is expected to be encountered at the Location. If drilling is successful, helium will be produced and processed at the Location. The helium will be stored in tube trailers onsite in gaseous form. Helium-filled tube trailers will be hauled off by truck. No natural gas will be flared or vented.

Carbon Dioxide and Nitrogen will be present and will be vented upon approval of a Form 4. Impacts to air from these inert gases will be minimal with volumes not exceeding listed amounts in below table.

<b>Enterprise State 16-1 (2962)</b>	<b>Gas Type</b>	<b>Daily Volume</b>
	Helium	40 mcf
	Carbon Dioxide (CO <sub>2</sub> )	75 mcf
	Nitrogen (N <sub>2</sub> )	385 mcf

Enterprise's facilities will continue to improve and undergo changes for more efficient capturing and selling of product. Updated plans will include all improvements.
