**General Comment:**

On 10/13/2021 Catherine Roy conducted a reclamation and stormwater inspection with COGCC Western Integrity Inspector, Richard Murray. The segment inspected during this inspection, included the area between well pad for the 067-06659 well, continuing south and east from CR 308, to where the right of way turns down-slope into the Florida River valley. During this inspection the following compliance issues were observed:

-Submit and implement a weed control plan by 11/20/2021. Plan needs to include a detailed description of the extent of the weed infestation, what weeds are observed along the right of way, how they will be controlled, and treatment schedule. The plan should also include a monitoring schedule as well as treatment goals and dates. Areas where desirable vegetation is effected by weed control, will need revegetation.

Operator should work with the surface owner and the La Plata County weed manager to ensure that the best treatment measures are employed and that the infestation does not continue.

-Revegetation needs to be conducted in portions of the right of way where sparse desirable vegetation is present. Erosion controls such as ecofiber mulch, or straw/hay mulch are needed until stabilized with desirable vegetation. Livestock exclusion will likely be needed in these areas until vegetation is established. Corrective Action(CA) Date: 11/20/2021.

-Remove and properly dispose of sign debris near partially buried tank, within the right of way. See below, and attached photos for additional detail. CA Date: 11/20/2021.
