Sam,

I went to approve the Form 6 and webforms ate the COA. it will have to go back to permitting and OGLA for them to add back on. Glad I spent an hour this morning on it to have that happen. You are good to go still, operate under the same COA from the other permits, I don't think there was anything added by OGLA other than the control emissions one.

I was going to change something and had decided not to so it was going to be approved as submitted. And will be someday.
