Operator Comments:

The reason for suspension of drilling operation was due to economics. Operator did not have capital budget to drill production holes. The anticipated date of resumption is April 2023. Operator plans to move in a production drilling rig capable of drilling the designed wellbores. Drilling the wells would be supported by using oil based drilling fluids.

Centralizer Program:

One Top-Co Bow Spring centralizer on bottom three (3) joints
One Top-Co Bow Spring centralizer on every 3rd joint
One Top-Co Bow Spring centralizer on top three (3) joints

I hereby certify all statements made in this form are, to the best of my knowledge, true, correct, and complete.
