

FINAL RECLAMATION SURFACE OWNER CONSULTATION

Crestone Peak Resources Operating, LLC (Operator #: 10633)

COGCC Location Name: Oster 43-28

Surface Owner Location Name (if different): _____

COGCC Location ID #: 332725 Consultation Date/Time: May 19, 2021 1:30pm

Directions to Site (from cross street): WCR 43 & 40; W. approx. 1500' on WCR 40;
N. approx 2000' along west side of dirt access road

Surface Owner preferred reclamation timing (season, month, year, etc.):

November 2021 - Feb 2022

Desired final land use description (cropland, range, equipment storage, etc.):

Cropland, center pivot.

Surface Owner specified seed mix? YES NO

If No, a NRCS (Natural Resources Conservation Service) recommended seed mix will be used.

Seed mix: _____

Surface Owner preference for flowline management. (COGCC requires removal for onsite flowlines. CPR prefers removal for offsite flowlines as well but is willing to discuss options for abandoning in place with a formal agreement with the Surface Owner.)

Abandon flowline in place.
See Flowline Abandonment In Place Consultation
form.

Additional surface owner reclamation concerns/requests. (amendments, road/pipeline ROWs, fencing, irrigation, site access):

Remove all road base around well. Remove access road from Ditch access to wellhead, & reclaim. Careful of center pivot. Add top soil, rip & disc. Plant per farmers seed request. TBD.

Onsite areas of concern. (weeds, debris/garbage, staining, equipment, etc.)

Surface owner requested deviations from standard reclamation practices. (leaving access roads and/or working surface, or other) (requested deviations/variances require preparation of a formal Surface Owner waiver agreement, and variance request with the Colorado Oil & Gas Conservation Commission)

Access road along West side of ditch is ditch maintenance road and MUST remain. The access from the ditch maintenance road to the well should be removed and reclaimed.

(Include a site drawing illustrating any requested variance.)

By signing below, the Surface Owner acknowledges that the Operator consulted with them on their preferences for final reclamation of this location when oil and gas operations are completed, and that:

1. They have a right to this consultation.
2. A right to their land being reclaimed to Colorado Oil & Gas Conservation Commission (COGCC) rules and regulations.
3. The operator is required to comply with COGCC rules for reclamation, stormwater, waste management and other applicable rules.
4. The operator is required to maintain the condition of the reclaimed surface and vegetation until the operator is relieved of further obligations by the COGCC.
