CORRECTIVE ACTIONS:

6 ☒ CA# 144202

Corrective Action: Submit Form 4 for review and approval to vent or flare.

Date: _____

Response: FACTUAL REVIEW REQUEST

Basis for Review: Corrective action dates are not attainable

Operator Comment: Inspection comment and corrective action is a misunderstanding of the process equipment reviewed on location and its specific function. The ECD on location is specific to the control of storage tank emissions: working losses, breathing losses, and flashing losses. Control of these specific storage vessel emissions does not warrant approval from the COGCC for venting or flaring. The storage vessels at the HORST-SCHUTT tank battery are not required to be controlled per AQCC Regulation No. 7. KPK voluntarily controls storage vessel emissions at this location through the operation of the ECD. An unlit pilot light in itself is not a violation of any rule or regulation at a voluntarily controlled location. Pilot light was relit at 3:30pm on November 5, 2020.

COGCC Decision: Approved pending re-inspection
