**Photo 3:** Photos provide examples of the cut slopes on the Location; control measures to protect and stabilize the cut slopes remain missing or insufficient per good engineering practices; erosion degradation evident.

Inspection Photos  
Operator Name: TEP ROCKY MOUNTAIN LLC #96850  
Location ID: 335542

**Photo 4:** Photos show undesirable plant species / weed debris has not been removed from the Location per corrective actions.

Inspection Photos  
Operator Name: TEP ROCKY MOUNTAIN LLC #96850  
Location ID: 335542

**Photo 7:** Photo shows stormwater outlet on the northwest end of the Location. Erosion degradation at outlet on the northwest end of the Location has been repaired; outlet has been reinstalled with use of geotextile lining, though Operator has used smooth rocks (such as river stone) rather than angular rock material per good engineering; smooth stones will accelerate stormwater, where as angular rock will dissipate velocity. No other controls have been implemented in conjunction with the outlet to allow for sediment laden-free stormwater discharge; unclear if outlet alone will be adequate to allow for proper stormwater discharge from the Location.
