General Comment:**COGCC Inspection Report Summary**

On Tuesday 11/30/2021 at approximately 1000, I, Inspector Scott Ramsey, conducted a routine inspection at TEP GGU 13-30, at Location # 335277 in Garfield county Colorado.

While there, I observed normal production operations. All meters have been calibrated on location within the past year. This location is within or in close proximity to a CPW Density/High Priority Habitat, black bear, NSO habitat, Wildlife Management Area and 411 water protection area. Operator (TERRA) has provided there Piceance Basin Storm water Manual of BMP's (SC-4) for a tracking pad, there is no evidence of tracking pad at time of inspection.

During this inspection the following compliance issues were observed:

1. South side of location show signs of erosion.
2. Tank secondary containment liner is failing. See photos.

Refer to photograph of observed compliance issue.

A follow up on this site inspection will be conducted to ensure the compliance issues have been corrected to comply with COGCC rules.

This is a summary of inspection report.
