FIELD INSPECTION FORM

Loc ID 433579 Inspector Name: Maclaren, Joe On-Site Inspection 2A Doc Num: _____

Status Summary:

- THIS IS A FOLLOW UP INSPECTION
- FOLLOW UP INSPECTION REQUIRED
- NO FOLLOW UP INSPECTION REQUIRED

Operator Information:

OGCC Operator Number: 10633
Name of Operator: CRESTONE PEAK RESOURCES OPERATING LLC
Address: 1801 CALIFORNIA STREET #2500
City: DENVER State: CO Zip: 80202

Findings:

- 3 Number of Comments
- 0 Number of Corrective Actions
- Corrective Action Response Requested

ANY CORRECTIVE ACTION(S) FROM PREVIOUS INSPECTIONS THAT HAVE NOT BEEN ADDRESSED ARE STILL APPLICABLE

General Comment:

COGCC engineering integrity inspection performed on November 29th, 2021 in response to initial form 19 spill report Doc #402876103 received on 11/19/2021 that outlines: On Friday November 19, 2021, a fire tube failed on a separator at the Frederiksen Facility (Location ID: 433579). As a result, approximately 15 barrels of oil and produced water were released inside unlined secondary containment. Fluids and visually impacted soil are being removed via hydrovacuum.

Details of observations made during this field inspection are located in the equipment section of this report. Photos uploaded.

Multiple Spills and Releases?

Equipment:

Type	#	corrective date
Horizontal Heated Separator		
Comment: An open excavation was observed around and under the HHS servicing the Fredericksen 1A well. The release occurred within containment. The failed equipment (HHS fire tube per report) was not observed during field inspection; repairs appear to be completed or scheduled. Spill response and remediation work is in progress. No Crestone Peak or contract personnel were on location at the time of inspection. Note: Document the cause of the equipment failure, description of repairs completed, well serviced by equipment and measures taken to prevent a recurrence in the corrective actions section of COGCC supplemental form 19.
