**Detailed description of the issue(s) \* (?)**

Please provide as much detail as possible. It is important to narrow down the issue(s).

From Nov 2, 2020 to Sept 1, 2021 I have been speaking with Ryan Adair - West Direct Oil Company and Sean Butcher - West Direct Oil Company about having diesel and gas stored here on my property since I live out from the city and not near convenient stations. Throughout our conversation, supported by the enclosed emails, I discussed that I wanted a gas storage tank and a diesel storage tank. I was insistent that I wanted a filter installed on both tanks, thus the reason for asking for the specs of the fuel tanks.

My office manager completed the initial application on 8/20/21 and submitted it to Equipment Savers - division of Direct Diesel that leases the tanks. We had to go back 4 times regarding the incorrect address on the tank lease agreement. I had to cancel the initial fuel delivery because the diesel tank I ordered wasn't available and they delivered the incorrect tank, but didn't say anything to me until the Equipment guy was off loading it here at my property. I really didn't like the first diesel tank because the nozzle was exposed and I was concerned about contamination and let both Ryan and Sean know this in an email. They delivered me a different diesel tank a couple of days later. This all took place around 8/28/21.

On 9/08/21 they delivered both fuels to us.

On 9/10/21, I syphoned off 5 gallons each of diesel and gas and put the contents in my gas and diesel containers. I filled 2 cars, an ATV, a truck and a forklift.

On 9/11/21, my office manager was running errands for me and texted 15 minutes later that the check engine light came on. I was out spraying weeds on my ATV and didn't get the text right away. My ATV died on me and when I was headed back to my workbench I looked at my phone and saw the text, I knew then that something was the matter with the fuel. My office manager called me and said that the car went into limp mode and almost died on her twice on the way back to the house. I collected jars from the dishwasher that I had just cleaned and poured out fuel samples from each of the gas and diesel cubes. I ran a test on the gas and it tested for heavy water and contaminants, so heavy it was off any chart I had. After the fuel sat for 20 minutes in a clear jar, it was visible that water and contaminants had separated out from the fuel. The diesel was contaminated with red off road fuel.

On 9/12/21 my office manager and I sat down and constructed an email to both Sean and Ryan to work out a resolution.

On 9/13/21 we sent it out to the both of them. The only response we received was that they were aware of the situation and they were sending out the Equipment Savers person and their manager. When the two of them arrived, they didn't even speak to me and the sample they took was the size of a small pill bottle. A short time later Ryan called to have the tanks removed off the property, but nothing about they were sorry this happened, nothing about repairing our vehicles, nothing. My office manager told Ryan he could have the
