General Comment:

Obtained two soil samples from apparent spill to the west of the tank battery. See attached results received 12/6/2021. TPH levels sampled on 11/3/2021 found total petroleum hydrocarbons (TPH) present in both samples at a level of over 11,000 mg/kg which indicate spill was never cleaned up to COGCC standards.

Form 27 has already been submitted and approved to remediate spill impacts. See Remediation Project 20712
