Describe what is known about the spill/release event (what happened -- including how it was stopped, contained, and recovered):

ENR is reporting a spill on the Boxster 12-23, reported by the landowner, Rayman Commesser to Mr. Jason Kosola at the COGCC on 11/9/2021. Mr. Kosola contact Chris Sanchez on the evening of 11/9/2021 to notify ENR of the landowner report. The ENR team was made aware of the spill on 11/10/2021 upon arrival to the office, around 6:30 AM. ENR employee was dispatched to the Boxster 12-23 around 7:00AM to complete the initial spill investigation. Upon investigation, it was determined that a leak from the packing on the well head had occurred. The regulatory team employee immediately isolated the spill by tightening the packing on the wellhead. Additionally, he notified the lease operator of the spill, and requested the Lease Operator follow up on the location. Upon investigation it was determined that 17.48 barrels of produced water had leaked from the wellhead. This leak was determined to have been contained to the wellsite location. This spill is still under internal investigation.
