Jeff and Ray,

During an Inspection at the Morgan A1 COGCC observed inadequate and downed fencing; see attached. Not only is the fencing down, orange construction fencing is not an adequate means of securing the excavation; no warning signs or any other barriers are present and there is both a school bus stop and playground within close proximity of the site. COGCC expects this to be addressed immediately as it poses a threat to public safety. There are also four separate stockpiles of soil with no signage indicating what they are as well as no fencing/barrier.

This is in a neighborhood and care should be taken to protect the public that lives here.

Nikki
