Crude Oil Transfer Line

The Flowline Report, Form 44, shall be submitted to register, report realignment, report removal from service, or report abandonment of Off-Location Flowlines, Produced Water Transfer Systems, Domestic Taps, or Crude Oil Transfer Lines as required by the 1100 Series Rules. The Form shall also be submitted to report Grade 1 Gas Leaks from Flowlines per Rule 1104.k.

Operator Information

OGCC Operator Number: 10633 Contact Person: Schuyler Hamilton Company Name: CRESTONE PEAK RESOURCES OPERATING LLC Phone: (303) 774-4017 Address: 1801 CALIFORNIA STREET #2500 Email: Schuyler.Hamilton@Crestonepr.com City: DENVER State: CO Zip: 80202 Is the Operator a Tier One member of the Utility Notification Center of Colorado (UNCC) that participates in Colorado's One Call notification system? Yes [X] No []

CRUDE OIL TRANSFER LINE

CRUDE OIL TRANSFER LINE IDENTIFICATION

Facility ID: Transfer Line Name: Pratt 4in Oil Extension Jurisdiction: COGCC

CRUDE OIL TRANSFER LINE REGISTRATION

Planned Construction Date: A representative legal location and associated latitude and longitude near the center of the transfer line. County: WELD Qtr Qtr: SESE Section: 29 Township: 1N Range: 68W Meridian: 6 Latitude: 40.016457 Longitude: -105.022198

CRUDE OIL TRANSFER LINE AS-BUILT SPECIFICATIONS

Date Crude Oil Transfer Line was Placed into Service: 11/30/2017 12:00:00 AM

Pipe Description and Testing

Type of Fluid Transferred: Condensate Pipe Material: Standard Dimension Ratio: (for HDPE pipe only) Max outer Diameter (inches): 4.000 Wall Thickness: Weight (lb/ft): Grade: Coating: True Bedding Material: Native Materials Burial Depth: Max Anticipated Operating PSI: Testing Pressure: Test Date:

Description of Corrosion Protection:

Corrosion protection for this line utilizes a rectifier located at the HUB facility. The Crude oil transfer line also is 100% coated in a fusion bond epoxy to further prevent corrosion potential. Rectifier system is checked every 6 months by third party contractor to ensure that it is functioning as intended.

Description of Integrity Management Program:

Crude Oil transfer lines is installed in accordance with 1102.b applicable technical standards. Operation of the pipeline is monitored in a control room by operators who are specifically trained on operating the transfer line and can shut in if abnormal conditions are suspected. Pressure testing per rule 1104.f of the transfer line is conducted annually. In the event repairs are necessary on the transfer line, all applicable rules will be followed to safely repair the transfer line.

Construction method used for all public by-ways, road crossings, sensitive wildlife habitats, sensitive areas and natural and manmade watercourses (i.e., bored and cased or bored only)

The transfer line was installed using best management practices, Pipeline was installed in an open trench following all applicable rules. When crossing a road and watercourses, boring was used to minimize all impact to surrounding areas.
