Site Investigation and Remediation Workplan (Supplemental Form)

This form shall be submitted to the Director for approval prior to the initiation of site investigation and remediation activities. However, this shall not preclude the Operator from taking immediate action to protect public health or safety, the environment, wildlife, or livestock.

This Form 27 describes site conditions as currently understood by the Operator; approval of this Form 27 by COGCC is based on the site conditions accurately described herein; any changes in site conditions identified during or subsequent to the performance of the approved workplan may necessitate additional investigation or remediation which shall be described on a supplemental Form 27. This Form 27 is intended to provide basic information regarding the proposed site investigation and remediation actions, but the workplan may be more fully described in attached documentation.

Closure request is not available for an Initial Site Investigation and Remediation Workplan.

INITIAL ACTION SUMMARY

Description of initial action or emergency response measures take to abate, investigate, and/or remediate impacts associated with E&P Waste.

On November 7, 2019, at 11:00 am land owner notified KPK about a potential flowline leak. KPK immediately shut-in flowline (Facility#8 Consolidated Line) same day.

PROPOSED SAMPLING PLAN

Proposed Soil Sampling

☒ Will soil samples be collected as part of this investigation? (Number, type (grab/composite), analyses, and locations of samples):

Final vertical and horizontal extent of the excavation will be based on results from collected grab soil samples. all soil Samples will be analyzed for TPH, DRO, GRO, ORO, BTEX, pH, EC, and SAR and verified complaint with COGCC Table 910-1. At a minimum, one grab sample will be collected from each excavation wall as well as from the base of the excavation area.

Proposed Groundwater Sampling

☒ Will groundwater samples be collected as part of this investigation? (Number, analyses, and locations of samples):

If groundwater is encountered during excavation activities, one (1) grab sample will be collected and verified complaint with COGCC Table 910-1. If analytical results exceed Table 910-1 thresholds, a Form 27 Site Investigation and Remediation Workplan for the investigation and remediation of impacts to groundwater in accordance with Rule 909.c. will be submitted.

Proposed Surface Water Sampling

☐ Will surface water samples be collected as part of this investigation? (Number, analyses, and locations of samples):

Additional Investigative Actions

☐ Additional alternative investigative actions described in attached Site Investigation Plan (summary):

Additional excavation required into adjacent landowner's property. KPK is working on an agreement with adjacent landowner to gain access to continue excavation activities.

Operator will comply with COGCC Rule 915 effective January 15, 2021. Operator will analyze confirmation soil samples for all contaminants of concern in Table 915-1. Operator will analyze groundwater samples for Organic Compounds in Groundwater (benzene, toluene, ethylbenzene, xylenes, naphthalene, 1,2,4-trimethylbenzene, 1,3,5-trimethylbenzene) and the Groundwater Inorganic Parameters (total dissolved solids, chloride, sulfate).</p> <p>-This form is being accepted into the record. However, Form 27 does not meet the requirements of Rule 913.d. Implementation Schedule, because no schedule for additional remediation has been provided. Operator shall submit a specific site investigation implementation schedule within 14 days.</p>
	<p>Operator submitted this form on 10/15/2021, COGCC returned this form to draft and uploaded a copy to the Remediation file on 11/3/2021 as it was deemed inadequate under Rules 901.a, 915, and COA's applied to previous Form 27s. Operator shall make the the following corrections and resubmit ASAP, no later 10 days after the form has been returned to draft.</p> <p>Additionally Operator Comments indicate "KPK/APEX Spill Project Status: August, 2021, Will install well after crop is harvested or after growing season* and plan is COGCC approved. 8/9/2021 Crew hooked up water pump to frack tank so water from irrigation can be pumped out of excavation hole."</p> <p>These comments appear to be related to nearby Remediation Project #16135. Operator shall provide comments and updates for the location referenced in Project Purpose and Site Information.</p>
	<p>Implementation schedule is missing the following information: Date of surface owner notification, actual spill date. Operator shall update this section on the updated Supplemental Form 27.</p>

	Operator has submitted a Proposed date of Remediation of 9/30/2022 and a Proposed date of completion of Remediation of 9/30/2024. COGCC does not believe this to be in compliance with 913.d.(1). Operator will investigate impacts to soil, Groundwater, and surface water as soon as the impacts are discovered.
