General Comment:**COGCC Inspection Report Summary**

On Thursday 12/16/2021 at approximately 1100, I, Inspector Scott Ramsey, conducted a routine inspection at Caerus H27NW, at Location # 335523 in Garfield county Colorado.

While there, I observed all wells shut in. Pad had a flow line leak and is under reconstruction. Form's 27's and 19's are on file. All meters have been calibrated on location within the past year. This location is within or in close proximity to a CPW Density/High Priority Habitat, black bear, NSO habitat, Wildlife Management Area. Operator (Caerus) has provided documentation of their Best Management Practices for Sediment Tracking Controls.

Soil pile is in an earth and berm.

During this inspection the following compliance issues were observed:

1. Separator units includes 3 attached storage tanks. The sight glass located on the side of the unit indicates the storage tank is full of an unknown fluid. No form of labeling or markers are present to identify a potential hazard or the contents of the storage tank.

2. Lack of battery signage

Refer to photograph of observed compliance issue.

A follow up on this site inspection will be conducted to ensure the compliance issues have been corrected to comply with COGCC rules. This is a summary of inspection report.
